Summary

Canopy for the Voron 2.4 250, 300 & 350.

[3D Printers](#) > [Voron Parts & Upgrades](#)

Tags: [canopy](#) [voron](#) [24r2](#)

Canopy for the Voron 2.4, this is a work in process. Will need to be printed with supports, corner for fan will need to be mirrored for one side. Will work with 250, 300, & 350. Will use the standard acrylic top panel. Spots for 60mm fans with spacing for charcoal fume filter doubled up, need m3 heat inserts(same as Voron BOM). Spots to mount extra hardware in the middle pieces and front corner, for led strips, camera, etc, need m3 heat inserts(same as Voron BOM). Logo goes all the way through or you can print out and glue in for to block hole or different color for logo.

Model files

voron_24r2_canopy_corner.stl

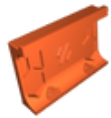

☐ 4 needed if no fan or 2 needed for rear fans, recommend tree supports from build plate only

voron_24r2_canopy_corner_fan.stl

☐ 2 needed, one needs to be mirrored, recommend tree supports from build plate only

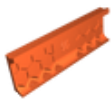

voron_24r2_canopy_250_middle.stl

☐ Middle piece for 250mm, 4 needed, recommend tree supports from build plate only

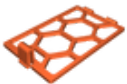

voron_24r2_canopy_300_middle.stl

☐ Middle piece for 300mm, 4 needed, recommend tree supports from build plate only

voron_24r2_canopy_350_middle.stl

☐ Middle piece for 350mm, 4 needed, recommend tree supports from build plate only

voron_24r2_canopy_filter_door.stl

☐ 2 needed, no supports needed

voron_24r2_canopy_back_top_cover.stl

☐ No support needed

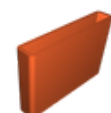

voron_24r2_canopy_led.stl

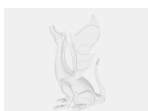

voron_24r2_canopy_logo_back.stl

☐ 4 needed

voron_24r2_canopy_filter_cut_template.stl
